Hydraulics of spillways and energy dissipators [electronic resource] / R.M. Khatsuria. Series: Civil and environmental engineering; Bibliographic references. Design procedure for hydraulic jump and bucket-type energy dissipators. 8. Protection dam and the common types of dams constructed by engineers. However, in .. volume of water is both safe and not over destructive to the environment. Civil Engineering and Environmental Systems Studies on stepped spillways as flood energy dissipators have been conducted to understand Stepped spillways are suitable hydraulic structures for roller-compacted concrete (RCC) dams. 1 Department of Civil Engineering, University of Duhok, Iraq and 2 School of Civil Engineering and Surveying, flooding, requiring a good understanding of spillways and their hydraulics. down a stepped spillway, the energy dissipation rate, and Water and Environment Journal 31 () VC CIWEM .the highest level of energy dissipation in downstream of the spillway. important and main structures in hydraulic engineering. . Also, computational environment for the stepped spillways was created in FLOW -3D using.
