AFRICAN ARCHAEOLOGY

David W. Phillipson

'In this book Dr Phillipson has brought together the new findings with earlier research to produce a very readable, relatively non-technical survey of the current state of knowledge of African prehistory. It is both timely and urgently needed.' *Nature*

'Phillipson's concise summary of the archaeology of human origins is both sober and satisfying.' ROLAND OLIVER

WORLD PREHISTORY IN NEW PERSPECTIVE

Grahame Clark

'... there can be no doubt that for the student or general reader who needs an overview of world prehistory this is essential reading'.
Geography

'No other archaeologist would probably have been capable of covering all aspects of the archaeology of the world so well as Professor Clark... He provides us with reliable facts about different cultures and their sequence, their characteristic features and geographical distribution, as well as their interrelationship with other cultures and their exact doings. With Grahame Clark as a companion you always feel on safe ground.'
